Dr. Philip Goldstein
Chairman, Department of Biology
Abraham Lincoln High School
Brooklyn 35, New York

Dear Dr. Goldstein:

Thank you for your letter of August 28. I was indeed very much impressed with "Genetics Is Easy" and hope you will soon bring out a revised edition.

My policy on reprinting is to permit entire, verbatim reproduction, to which you might of course add whatever clearly identified editorial comment you wished. At the other extreme, the customary short quotations are of course freely available.. Unfortunately, I do not have time to review edited versions that are suggested from time to time. I do hope this meets with your satisfaction. If my original papers do not qualify, you may wish to look over some of the brief reviews checked on the enclosed list.

Sincerely yours,

Joshua Lederberg
Professor of Genetics
